

Automate your Facebook post using Python

- If you are Digital marketing analyst or YouTuber or even blogger, i know you will definitely share your content on different platforms.
- The most popular social media platform is Facebook.

I wrote a script that helps you to login you to Facebook and post on your news feed. Here we need a Python selenium package to automate this task, so please download it with corresponding Chrome or Firefox Browser version.

Firstly we have to

- **To download Chrome drive for chrome Users**
- **To download Firefox driver for Firefox Users**

If we don't installed python selenium in our system then use the below command to install it.

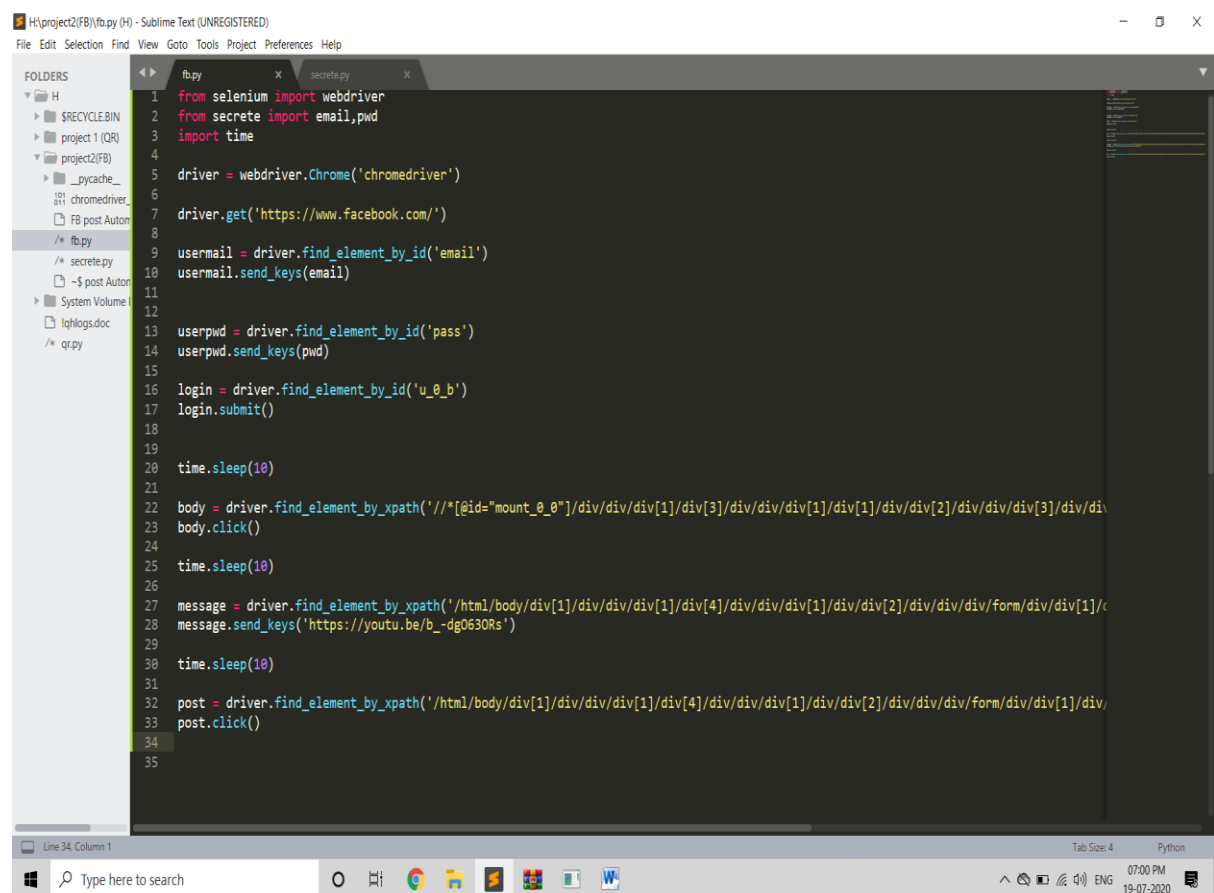

```
pip install selenium
```

How to automate Facebook post using Python

Create a file secrete.py in this file we have give our Email and Password. Like given below

```
Email = '*****@gmail.com'
Pwd = '*****'
```

Here i am giving the entire Python script to automate your Facebook post using Python.

```
1 from selenium import webdriver
2 from secrete import email,pwd
3 import time
4
5 driver = webdriver.Chrome('chromedriver')
6
7 driver.get('https://www.facebook.com/')
8
9 usermail = driver.find_element_by_id('email')
10 usermail.send_keys(email)
11
12
13 userpwd = driver.find_element_by_id('pass')
14 userpwd.send_keys(pwd)
15
16 login = driver.find_element_by_id('u_0_b')
17 login.submit()
18
19
20 time.sleep(10)
21
22 body = driver.find_element_by_xpath('//*[@id="mount_0_0"]/div/div/div[1]/div[3]/div/div/div[1]/div[1]/div/div[2]/div/div/div[3]/div/div')
23 body.click()
24
25 time.sleep(10)
26
27 message = driver.find_element_by_xpath('/html/body/div[1]/div/div/div[1]/div[4]/div/div/div[1]/div/div[2]/div/div/div/form/div/div[1]/div')
28 message.send_keys('https://youtu.be/b_-dg0630Rs')
29
30 time.sleep(10)
31
32 post = driver.find_element_by_xpath('/html/body/div[1]/div/div/div[1]/div[4]/div/div/div[1]/div/div[2]/div/div/div/form/div/div[1]/div')
33 post.click()
34
35
```

Don't forget to give your password, email and message on requirefields. Once you execute this script you will see the magic.

It will automatically login you and post your post on news feed. you don't need to do anything.
